

Canadian Legion Memorial Service

It was an impressive scene at the Butte on Sunday afternoon when with the members of the Canadian Legion and other returned soldiers, a large assembly of citizens and farmers and their families lined up on each side of the memorial cairn at the annual memorial service for the men of Didsbury who gave their lives during the Great War of 1914-18.

The returned men paraded to the Butte headed by the combined Calgary Native Boys' and Didsbury Boys' Bands, who also accompanied the singing during the service.

The service was conducted by Comrade Rev. N. W. Whitmore of Olds.

Wreaths were laid on the memorial by Mrs. J. A. McGhee, Regent of the local chapter I.O.O.F., and Comrade W. A. Austin, president of the Didsbury Branch of the Canadian Legion. Flowers were presented by several children.

The "Last Post" and "Reveille" were sounded by Comrade W. D. Hayward, leader of Calgary Native Boys' Band.

Rev. Whitmore in his address recounted incidents that occurred during the Great War and said that the memories of the returned men made them advocates for peace. He spoke of last year's pilgrimage to the battlefields and of the memorial at Westminster Abbey to the Unknown Soldier and of Canada's great memorial at Vimy Ridge.

Mr. Whitmore expressed the thanks of the Legion to the members of the Calgary and Didsbury bands for their assistance in the service.

After the service the combined bands gave a band concert on the C.P.R. grounds which was greatly enjoyed by a large crowd.

Jack Stock of Hanna spent a few days last week with the Boorman family.

Will Enforce Bank Legislation

In a letter to Prime Minister King Premier Aberhart asserted that Alberta intends to put into immediate effect the legislation passed at the recent session of the provincial legislature and later disallowed by Ottawa.

Copies of the letter sent August 26th were released by Mr. Aberhart on Monday at Edmonton.

Premier Aberhart declared that "While awaiting the outcome of any negotiation that might be entered into we must, in the meantime, proceed most rapidly to end poverty and starvation in this province. In order to accomplish this we are going to implement immediately the legislation passed at our last session and which you purported to disallow."

"Implement," the premier said, when questioned on his use of the word, meant "enforcing" or "putting into effect."

Latest letter in a series between Mr. Aberhart and the prime minister of Canada since the federal government disallowed three acts passed by the provincial legislature at its special session early in August, the communication amplified a telegram sent by Mr. Aberhart to Ottawa last Thursday, protesting the disallowance and challenging Ottawa's right to disallow.

"We propose to go through the formality of asking you to withdraw your 'disallowance' before it is proclaimed here," the letter said.

Cremona Farmer Drowned In Scotland

The body of George Spencer, aged 67, of Cremona, was taken from the harbor at Stonehaven, Kincardine, Scotland, according to a report received on Monday.

Spencer was an oldtimer in the Cremona district, having resided there for twenty years. He left here last May to see the coronation and to visit relatives.

NOTICE

To Relatives of Persons on the Assessment Roll and to Tenants.

Notice is hereby given that during the months of September and October applications may be made under the provision of Section 188 of the Town & Village Act for inclusion in the Voters' List of the Town of Didsbury by the following persons, namely:

The wife, husband, father and mother, and every son and daughter of any person whose name appears on the Assessment Roll, and who are entitled to be placed on said voters' list:

(a) if he or she is a resident with the said person within the town, or assists him in business in respect of which he is taxable; and

(b) if he or she is of the full age of twenty-one years; and

(c) if his or her name does not already appear on the assessment roll; and

tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August of this year; and the wife, husband, father and mother and every son and daughter as qualified by paragraphs (a), (b) and (c) hereof.

W. A. AUSTIN
Secretary-Treasurer.

Labor Day.

On Monday, September 6, (Labor Day) all business houses will be closed and will be open all day next Wednesday.

School Fair Next Wednesday

The Community Hall School Fair will be held next Wednesday, September 8th. The pupils of Rosebud, Grand Centre, Gore, Jutland, Neapolis and Mona schools will take part.

Exhibits of livestock, garden produce, domestic science and school work will develop considerable competition, as the children are taking great interest, and a record number of entries is expected.

Besides the regular awards there will be sixteen special prizes donated by the Didsbury business men.

During the afternoon there will be races and sports for the school children.

Admission: Adults 25 cents, children free.

Bride-to-be Entertained

Miss Evelyn Liesemer entertained a number of friends at her home on Monday afternoon in honor of Miss Wynne Studer, who is to be married on Saturday of this week. Three tables of bridge were played, the honors going to Mrs. C. R. Ford. The guest of honor was presented with a silver dish in honor of the occasion. A delightful lunch was served by the hostess.

On Wednesday afternoon, Miss Studer was honored with a fruit and pickle shower by Mrs. W. Sheebottom and Mrs. E. M. McCall at the home of the former at Olds. The shower was attended by a large number of friends both from Didsbury and Olds.

Knox United Church Notes.

The services next Sunday will be in charge of the pastor, who will give a Labor Day message on the theme "Jesus the Carpenter." A cordial invitation is given to all.

On Sunday week (September 12) the Sacrament of the Lord's Supper will be observed. We ask all our friends to make a note of this.

King Silent on Aberhart Reply

Whatever further action the federal government proposes, with respect to Alberta's determination to proceed with legislation it has disallowed, will probably not be disclosed for several days.

Prime Minister Mackenzie King revealed Tuesday night as he was about to write a letter to premier William Aberhart in reply to two from the Social Credit government leader, one announcing his determination to disregard disallowance, and the other criticizing the personnel of the Rowell commission on economic relations between the Dominion and the provinces.

Contents of the communication will not be made public until it has reached the hands of Mr. Aberhart.

Premier King had previously made a statement that the matter regarding the Alberta Bank Act was closed.

Appointed To Advisory Council

W. H. Davies of Didsbury and Stanley A. Fox of Innisfail, the two members from Southern Alberta, were appointed to the provincial advisory council proposed by E. L. Gray, provincial leader of the Liberal party, to assist in joint action by Liberals, Conservatives and members of the U.F.A. to effect the establishment of a sound business government at Edmonton.

Bridal Shower.

Mrs. Walter Pratt and Miss Edith Pratt were the joint hostesses at a kitchen shower last Thursday afternoon at the former's home in honor of Miss Isabelle Pratt, a September bride-to-be. Ten towels were embroidered and, after a delicious lunch, presented to Miss Pratt along with many useful gifts.

On Friday evening friends and neighbors paid a surprise visit to the home of Mr. Charles Pratt. Games were played until lunch time, after which Mr. Gordon Pearson, on behalf of the group, presented Miss Pratt with a purse of money. The bride-to-be thanked one and all for their kind wishes and beautiful gifts.

Wishing her many happy years of married life, the crowd departed after having had a very enjoyable evening.

Art, Betty, Mary and Sammy Boorman who finished their vacation visiting relatives in the Lacombe district returned home Sunday.

Big Size C.C.M. Exercise Books, 2 for 5c. School bags 90c up at T. E. Scott's.

Birthday Party.

It was a grand and happy surprise for Grace Hunsperger when about sixty neighbors and friends dropped in to help celebrate her birthday on Tuesday evening.

Games were played on the spacious lawn which was lighted by a lantern. Later, when all had gathered into the house, several of the guests entertained with pianoforte selections and a recitation was given by Dave McEwen.

Many beautiful gifts were presented to Grace who in return graciously thanked the donors.

A very delectable lunch was served including ice cream and a lovely birthday cake made by Mrs. Fred Befus.

After singing "For She's a Jolly Good Person," the guests returned to their respective homes, feeling they had a very enjoyable evening.

Travel Bargains to Coast Are Announced

Those who are planning early Fall vacations will welcome announcement of bargain fares to the Pacific Coast by Mr. J. A. McGhee, Canadian Pacific ticket agent.

Tickets will be on sale September 4th to 12th inclusive, with thirty days return limit, and will permit stopover at Calgary, Nelson and stations west.

A feature of these fares will be the privilege of tourist or standard sleepers at slightly higher rate and usual berth charge. The special cent-a-mile fare good in coaches will also be available.

The early Fall is usually a delightful time to visit the coast, and present indications point to a record travel; those contemplating the trip would be well advised to get in touch with Mr. McGhee as early as possible.

Catalogues have been issued for the Calgary Sheep and Swine Show and Sale which will be held October 20th, 21st and 22nd. Entries close on September 20th.

Doctor And Patient

A symposium of replies to a questionnaire sent out to doctors by the American Foundation on the availability of adequate medical care for the populace generally, probably affords a key to the reason for the growing public demand for systems of state medicine or state health insurance.

The replies indicate that, in a broad sense, adequate medical care, no matter how conservatively the phrase is interpreted, is not generally available and certainly not as available as it should be, and for a number of reasons.

While the information and opinion secured is, of course, applicable to conditions in the United States, there is little doubt that it is equally applicable in Canada, and in some respects more particularly in Western Canada, where similar social and economic conditions exist to those on the other side of the international boundary.

That the problem of providing adequate medical care for the people is bounded by social and economic conditions is specifically revealed in the numerous replies received and it is because of this fact that public demand for state medicine is becoming such a prominent issue nowadays.

Quoting the Foundation's own summarization of the replies to the question: "Is adequate medical care now readily available?" the Foundation points out that many agree there is no categorical answer to such a question because of disagreement as to its meaning, "but, if medical care is interpreted to mean the kind of care needed to enable citizens to maintain 'positive' health, preventing incipient illness from progressing to serious consequences, as well as doing all that can be done to restore the sick individual to health, the weight of opinion is certainly that adequate medical care is not available.

"Even if adequate medical care is less ambitiously defined," to further quote the Foundation's summary as reported in the current issue of the "Canadian Doctor", "this section contains a good deal of evidence in the form not of statistics but of direct picture (by men on the scene) to justify the premise that a large part of the population does not receive adequate medical care.

"(a) because it costs too much, especially hospital service and the laboratory aids to diagnosis;

"(b) because it is too far away, as in the vast agricultural areas far removed from medical centres and without either hospitals or practitioners;

"(c) because the public generally does not understand and is not asking for modern scientific medical care, much of the population definitely preferring quacks, cultists and patent medicines, and, finally and most important;

"(d) because in the medical care of the present 'the best is not yet good enough', to cite many spokesmen.

"The reasons why medical care is not yet good enough are many, but these are the reasons most frequently brought forward by the physicians:

"(a) There is a lag of years in new medical knowledge;

"(b) present medical training is not yet uniformly good;

"(c) present licensing is too broad;

"(d) too many graduates do not or cannot keep up their competence;

"(e) medical imagination still does not sufficiently perceive that prevention rather than cure is the real and ultimate goal of medical science, as many competent leaders of medical science in this discussion declare it to be."

In view of the fact that the foregoing conclusions represent the consensus of opinion of apparently a substantial cross section of the medical profession, considerable weight must be given to the information, but it should be pointed out that it does not necessarily coincide with the lay viewpoint in its entirety.

When for instance the medical men declare that a large percentage of the population does not receive adequate medical care "because the public generally does not understand and is not asking for modern scientific medical care," they are making a statement which is open to debate.

It could very well be argued that a substantial percentage of the public does not understand modern medical science, not because of any lack of desire to do so, but because there are yet too many doctors who adhere to the old fashioned doctrine that the less the patient is told the better and it is not surprising if, under such circumstances, patients fall back on the too voluble quack for remedy.

In the minds of the public the practice of medicine is often too much shrouded in mystery which might be dispelled if more doctors took the patient into their confidence when making a diagnosis and wrote their prescriptions in a form which could be understood by a layman.

After all no person has a greater right to know what is wrong with him or her, to know what the doctor believes to be the cause of the ailment and the remedy that is being prescribed than the patient who is paying or "owing" for the service.

Sometimes a little more explanation of causes, conditions and treatment would create a greater public confidence which would yield dividends to the "regular" medical profession.

The father of Patrick Henry was born in Scotland. His mother was of Welsh descent.

The average mean temperature at Miami Beach is 75 degrees.

BLACKHEADS

Don't squeeze blackheads—dissolve them. Get two ounces of peroxide powder from any drug store and rub gently with wet, hot cloth over the blackheads. They simply dissolve and disappear by this safe and sure method. Have a Hollywood complexion.

Honored By The King

Two officers who were in charge of police guarding the Duke of Windsor's Fort Belvedere country home during the days immediately preceding his abdication, were honored by the King at Buckingham Palace. They were Superintendent Curry and Sergeant Backshell, and it was understood they received the Royal Victorian Order.

A violin is composed of 70 separate parts.

Roads Of The World

Ford Has On Exhibit Materials From 18 Famous Highways

In the grounds of the Ford Rotunda at Dearborn, Michigan, the "Roads of the World," comprising materials from eighteen famous highways, has been opened to the public. The materials consist of stones, slabs and soil.

The dedication of the "roads" was witnessed by consular officers of countries represented in the roads, also many good roads officials.

Among the representations are the Appian Way, the famous Roman highway; the "Summer Palace" Road over which the Manchu emperors rolled from the old capital in what is to-day modern Peiping to the royal Summer Palace; the ancient Grand Trunk Road of India, whose northern reaches led through the fabled Khyber Pass, and the Diamond Rush Road of South Africa, over which Cecil Rhodes transported fortunes in diamonds from the De Beers mines to Port Elizabeth.

Naval Treaty Ratified

Provisions Of 1936 London Agreement Have Become Effective

Provisions of the 1936 London naval treaty became effective with the ratification by the United Kingdom, Canada, Australia, New Zealand and India.

Instruments of ratification were deposited at the foreign office. Sir Robert Van Stittart, permanent under-secretary for foreign affairs, signed for the United Kingdom; Sir Findlater Stewart, permanent under-secretary for India, for India; High Commissioner Vincent Massey for Canada; High Commissioner Stanley Bruce for Australia; and High Commissioner W. J. Jordan for New Zealand.

The United States deposited ratification a year ago and France a few weeks ago. The treaty limits the size and armament but not the number of naval vessels and provides for an interchange of information regarding projected naval construction.

Looks Like A Record

Remarkable Facts About Family Of 97-Year-Old Woman

Mrs. Anna Pond, of Waterford, Ont., is 97 years of age. She reads a good deal, and prefers newspapers because they come fresh each day. Mrs. Pond has no time for worrying and cannot be convinced that it ever did any good anyway. If the weather is favorable this lady of 97 goes to church on Sunday and she also likes to attend Sunday school. What's more she walks. Both ways.

All of which is interesting but not so remarkable as other facts regarding her family. Mrs. Pond is the mother of 11 children and they are all living, and she herself is the eldest of a family of four and her two sisters and brother are also living, their ages being 89, 82 and 86.

We cannot recall having read or heard of another case like that. A woman of 97 with 11 children living, and with all her own generation still here.—Peterboro Examiner.

Traffic Control For 'Planes

Vancouver Airport Has Installed Traffic Control Projector

Among recent additions to the Vancouver airport is an airport traffic control projector, one of the latest safety devices put on the market. Familiarly termed "traffic guns," lights of this type are used at all the leading United States airports for day and night control of aircraft not equipped with radio.

Although fitted with only a 50 candlepower lamp, the light is visible in bright sunlight for over three miles. The light is sighted like a gun and can also be used for code signalling with white, red or green light, as a spotlight, and for making estimates of the cloud ceiling at night.

This "projector" is believed to be the first of its kind used in Canada and became necessary through the steady increase of traffic at the airport.—Canadian Aviation.

Heaven only knows where the motor-world is hastening to. It has been well described by a Chinese observer as "motion without motive."

A 250-pound hog will yield from 12 to 15 per cent. of its weight in cuts suitable for bacon.

Large FLEET OWNERS find Firestone TIRES MOST ECONOMICAL

Large fleet owners who analyze tire costs to the fraction of a cent prefer Firestone Tires for their cost-cutting, carefree performance. You, too, will find them the safest, longest-wearing and most economical for your car.

With all their features for safe, long mileage, Firestone Tires do not cost one cent more than ordinary tires. See the nearest Firestone Dealer and replace worn tires today.

Firestone

HIGH SPEED TIRES

Output Being Increased

New Equipment Has Been Installed At Ontario Radium Refinery

Dr. Marcel Pochon, director of the Ontario radium refinery at Port Hope, announced that the annual output at the refinery would be increased from one and a half ounces to four and one half (126 grams).

Dr. Pochon made the announcement following consultations with officials at the national research council at Ottawa, to which new equipment the refinery had purchased was sent for testing purposes.

The new equipment, Dr. Pochon said, would make it possible to supply some of the radium needs in the United States as well as in the British Empire which up to now has absorbed almost all the Canadian output.

Canada exported \$8,418,000 worth of zinc during 1935.

Japan Using Wheat

Use Of Wheat Becoming More Popular Every Year

The use of wheat flour bread becomes more popular in Japan every year. It is estimated 42 per cent. of wheat flour consumed is used for bread and cakes of various sorts, as compared with 35 per cent. three years ago. The Japanese are fond of macaroni and formerly about 50 per cent. of the flour was consumed in that way, but it is estimated to have decreased now to some 38 per cent. The chemical industry's use of flour has increased from 10 per cent. to 15 per cent. The remaining five per cent. is used in miscellaneous ways.

While the bulk of bread consumed is white, whole wheat is gaining in favor. An interesting feature is the experiment recently made by one of the biggest bakeries in Tokyo of turning out oatmeal bread. This quickly became popular and the bakery can barely fill the demand.

Cut Down Food Wastage

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

Debate Question Of Rapid Pace Of Invention Being Cause Of Unemployment

No light summer reading was the 450,000-word document which President Roosevelt took with him on his week-end cruise down the Potomac. The bulky treatise was entitled "Technological Trends and National Policy, Including the Social Implications of New Inventions." Under the direction of Sociologist William Fielding Ogburn, of the University of Chicago, the report had been prepared by a sub-committee of the science committee of the National Resources Committee.

Whether the pace of invention and technological improvement is beneficial or harmful to society as a whole, is a large subject which lends itself to long-winded diatribes and has already been debated to a frazzle. Secretary Wallace has warned Science that it had better consider taking a holiday. Scientists, including Caltech's Millikan, M. I. T.'s Karl Taylor Compton and Bell Telephone's Frank Baldwin Jewett have retorted that Science makes jobs by creating new industries.

One of the most telling thrusts which defenders of Science have made against the bogey of "technological unemployment" is that after a half century of sweeping technological advance, a higher percentage of the U.S. population was gainfully employed in 1930 (40 per cent.) than in 1880 (34 per cent.).

The National Resources Committee was established by an Administration order in July, 1934. It was allotted \$800,000 from the Emergency Relief Act appropriations of 1935. Professor Ogburn's sub-committee was told off to appraise current technological trends and their probable impact on society. This group included President Frank Rattray Lillie, of the National Academy of Sciences, President John Campbell Merriam, of the Carnegie Institution, President Edward Charles Elliott, of Purdue University, a handful of economists, educators and one mathematician.

The sub-committee admitted that "invention is a great disturber," but also agreed with the defenders of Science that it creates new industries, new reservoirs of employment. Professor Ogburn suggested that if in 1900 the U.S. had had national planners who foresaw the development of the telephone, the airplane, the cinema, the automobile, the radio and the rayon industry, the pattern of society to-day might be different from what it is.

The report recommended establishment of a board which would keep track of developments in and try to foresee the sociological impacts of 13 new technologies which seem to be gathering headway for a booming future. The 13:

- (1) Synthetic rubber.
 - (2) Automobile trailers.
 - (3) Plastics.
 - (4) Artificial cotton and woolen like fibres from cellulose.
 - (5) Prefabricated houses.
 - (6) The mechanical cotton picker.
- Most successful of such pickers is the machine devised by John D. and Mack Rust of Tennessee, social-minded brothers who are resolved to cushion the impact of the machine on Southern labor but are selling and demonstrating their pickers in Soviet Russia. After several demonstrations U.S. cotton men are still divided as to the Rust picker's practicability.

(7) Air conditioning. This is commonly touted as the next big job-making industry. The Ogburn committee also pointed out that it may affect industrial distribution in hot sections of the U.S.

(8) Television. Arrived at a satisfactory technical stage, but fearful of taking the economic plunge.

(9) Gasoline produced from coal. The process (hydrogenation) employs high heat and pressure, has already made a start in Germany and England, remains in the experimental stage in the U.S. which has oceans of oil.

(10) Facsimile transmission: The art of transmitting photographs, drawings or printed messages by radio. In the RCA-Victor method, a radio-controlled stylus recreates the image by moving over a strip of carbon-backed paper. RCA-Victor

spokesmen have painted the possibility of radio newspapers, transmitted during the night, awaiting the reader by his bedside when he wakes up in the morning.

(11) Steep-flight airplanes. Craft able to take off from or land on small areas such as flat roofs in the hearts of cities.

(12) Tray agriculture: The technique of growing plants in tanks of water containing nutrient chemicals. Dr. William Frederick Gericke, University of California, has shown that lush crops can be grown in tanks without interference from drought, floods, freezing, erosion, insect pests, soil exhaustion.

(13) Photoelectric cells: The "electric eye" which opens doors, sorts out defective products on factory conveyors, keeps elevator doors open until passengers are in or out. "That it will cause unemployment is obvious, but it will also lighten the tasks of the workmen. Indeed it brings the automatic factory and the automatic man one step closer. It may be used to regulate automobile traffic, to measure the density of smoke, to time horse racing, to read, to perform mathematical calculations."

As for its point of view in time, the Ogburn committee declared itself thus: "It has been thought best to focus on the near future, which is defined as the next 20 years; but any blinders that cut off sharply the present, the more distant future, or even the recent past, would mean an inadequate investigation..."—Magazine Time.

Sew Up Heart

British Surgeons Perform Remarkable Operation On Young Munition Worker

A month after surgeons had twice removed his heart to close stab wounds, Harold Aldridge, 23-year-old munition worker, was back at his job filling shells.

The story is told in the medical journal, *The Lancet*, by Dr. William Gissane and Dr. Bodo Schulenberg, surgeons, who performed the operation.

The lung covering was opened and a wound found in the envelope which encloses the heart. This envelope was opened but nothing could be seen of the heart.

One surgeon placed his hand inside the envelope and gently levered out the heart, which beat steadily. A wound three-quarters of an inch long was found and sewn up while the first surgeon still held the pulsing heart in his hands. The heart was then replaced.

To their dismay the heart envelope again filled with blood as one surgeon again put his left hand inside the heart envelope and traced a second stab wound with his finger and the operation was repeated.

In six days Aldridge got out of bed and walked 40 yards. In 28 days he was discharged.

Women On The Land

Form Large Per Cent. Of Agricultural Workers In Wales

At a time when men are increasingly deserting the farm for the factory it is interesting that in Wales women are working on the land in increasing numbers.

The Advisory Council for Technical Education in South Wales and Monmouthshire now engaged on a survey of the main industries with a view to planning education for vocations reveals that 6,370 women and girls are regularly employed, 965 casually on agricultural holdings of one acre and upwards in the region.

This comprises 22.8 per cent. of the total agricultural workers in the seven Southern Welsh counties. A large number of the female workers are engaged in manual labor—Industrial Britain.

A hybrid potato with a smooth skin has been perfected by an employee of the U.S. bureau of Plant Industry.

Glasgow is to close eight city streets during the evening for use as playgrounds.

Fleet Air Arm

Now To Be Under Control Of The British Admiralty

Prime Minister Chamberlain announced in the House of Commons that the fleet air arm—Great Britain's naval air force—henceforth will be under the "administrative control of the Admiralty."

Heretofore 'planes attached to the fleet have been under dual control. When at sea they have been subject to the orders of the naval authorities. On land and in training establishments the Air Ministry has exercised jurisdiction.

Anomalous position of the fleet air arm for long has been the subject of controversy, and partisans of the navy have waged a strenuous campaign to obtain full control for the Admiralty.

The Prime Minister declared the decision did not reflect on the present condition of the fleet air arm but had been reached because the Government believed the lines laid down in the announcement would be the most satisfactory arrangement for the future.

A leader in the navy's fight for full control by the Admiralty of the fleet air arm has been Admiral of the Fleet Sir Robert Keyes, M.P. In a recent speech he declared:

"There is nothing more important than for the navy to be equipped with an air force second to none. I, and others, are fighting very hard to get the navy given absolute freedom to develop its air force in the way it thinks necessary."

"The present system is absolutely illogical. If our fleet should meet one with better air force equipment, that probably would decide the issue of the battle. Yet the navy to-day has no control over its air force until it is actually embarked."

The Canada Thistle

Not Native To This Country, But Was Introduced From Europe

The Canada thistle which is overrunning a large part of the North American continent is not Canadian at all, a fact of which farmers in the United States are unaware when they heap maledictions on its inroads into their fields. The Canada thistle was introduced from Europe. Some of the plants bear male flowers only, which form no seeds; other plants are female and all seed. The flowers of the Canada thistle vary in colour, ranging from pale purple through shades of pink to white.

Owner Had The Key

A little story of church attendance—or the contrary. A clergyman on holiday down in the west of England went into a village barber's for a haircut, and during the operation the turn of the conversation led him to ask the barber whether he belonged to church or chapel.

"Well, sir," was the reply, "I can't really say as I go to either, but it's church I stops away from."

Every automobile accident concerns every motorist. It affects the rate of his automobile insurance.

American Engineer Pictures Motor Roads Constructed For Traffic In Year 1960

Welcomed In Japan

Object Of Helen Keller's Visit Was To Help Blind

Helen Keller—whom all the world knows as the child, deaf and blind since infancy, who became a highly educated woman and writer and speaker of distinction—was accorded a warm welcome during her recent visit to Japan, according to letters received from missionaries of the United Church, Miss Constance Chappell and Miss Isabel Govenlock, stationed in Japan.

The trip was originally planned by a small group of Japanese educators of the blind, but her visit assumed a nation-wide importance—Government, people and the Emperor and Empress welcomed her.

There are 67,000 blind folk in Japan and Miss Keller's immediate objective was to introduce into the Orient the newly perfected "talking book," a phonographic invention, and otherwise help in other ways. She had two interpreters—a Miss Thompson, her helper, and Dr. Iwahashi, a blind professor, who received his Ph.D. in Edinburgh after blindness overtook him. Although she spoke at many gatherings, Helen Keller was most at home in Christian groups.

Quota For British Films

British Government Decides To Continue The Ten-Year Quota Plan

The Imperial government has decided to continue the 10-year quota for British films. Unless some action was taken the quota system would lapse next March 31.

The quota system is aimed at stimulating production of British films by imposing an obligation on renters of films and exhibitors to show a certain proportion known as a quota during each year.

The government's plans, which are embodied in legislation, further aim to improve the quality of British films. (Under the government's proposals, a renter is a person who acquires films from the producer. He distributes copies to the exhibitor for exhibition of movies.)

Owner Had They Key

Police Sergeant Edward F. Tucker, off duty, strolled out of a restaurant in Newark, N.J., and saw a young man trying to start a car "What's the matter, Bud?" he asked. "Can't get it started." "The ignition key is not in the lock," said the sergeant politely. "I haven't got it," said the young man. "I have," said Tucker. "It's my car." So to jail.

When the skin is moist, the resistance to electricity is greatly decreased and serious shock may result from the low voltage.

On what kinds of roads will motorists of 1960 travel? Charles F. Kettering sketched the highway system of the future for the American Society of Civil Engineers in Detroit recently, and drew a picture of a land laid out for speedier travel on wheels. It has its disconcerting aspects to those appalled by nearly 40,000 fatalities yearly in motor accidents. Yet Mr. Kettering was convincing in his argument that cities, and suburbs of the future will solve highway safety problems that now perplex us. He does not, however, attempt to guess how airplanes will affect the solution.

He said that by 1960, roads must be provided for 50 per cent. more vehicles than now are registered. In the decade preceding 1929 the number of motor vehicles increased 250 per cent. The population movement appears to be away from large cities. Mr. Kettering holds that traffic congestion and parking problems will quicken this movement; that "ribbon" cities may develop an almost continuous urban life on both sides of a trunk highway; that men may live in the country 50 miles from their work and commute on high-speed trunk highways; that cities of the future may require webs of elevated and underground roads to carry the heavier traffic; that many miles of highways between populous communities will be lighted economically and other means used to reduce hazards of night driving.

Highways programs must be drawn up in anticipation of a steady increase in motor bus traffic, and an increasing use of trailers will hasten the widening of highways and bridges and provision of better parking facilities for family treks.

As fascinating as this engineer's vision of the highways of the future is it may depress taxpayers who consider the present condition of roads throughout the country.

One recent estimate disclosed more than 3,000,000 miles of roads and highways in the nation. State highways, totalling more than 520,300 miles in 1935, have since been lengthened, but only 128,000 miles are classified as high-type surfaced roads—only four per cent. of the total road and highway mileage of the nation. Highway authorities of the future must devise ways to improve and maintain existing highways and obtain funds for additions. New York Sun.

King Solomon's Mines

One Of The Workings Located On Edge Of The Arabian Desert

Old King Solomon wasn't so much as a gold miner. This news comes to light with the reopening of one of the famous King Solomon's mines. It is at Saudi, on the edge of the Arabian desert, and it has been taken over by a combination of British and American mining men. The mine is evidently one of the famed string which supplied King Solomon with all the gold for the glittering display of wealth with which he astounded the Queen of Sheba and other persons who flitted across the pages of the Old Testament. The mines have been located by students of ancient lore as being all the way from the Urals in Russia to Rhodesia in South Africa. And, as the Arabian desert is in between, it should be well in line as one of Solomon's stores of riches.

However, present day miners don't think a great deal of Solomon's mining men. They have been looking into the workings and they find the ore in the mine should assay at \$20 per ton. But there are a lot of tailings which have been left by the ancient miners of King Solomon's day. And, the present day miners find these tailings can be sent to the smelter and will assay at \$14 per ton. So that for every ton of gold mined, King Solomon took out only \$6 worth, left the other \$14 worth as tailings. —Windsor Star.

A recent English invention is the egg-opener, which lifts the top off a boiled egg without damaging the yolk.

Moscow, Russia, has only five telephones for every 100 inhabitants.

Matched Crochet for Bedroom or Bath

Household Arts by Alice Brooks

Rug Scarf and Towel Set to Make for Summer

PATTERN 5752

Wouldn't your bathroom be a brighter spot with the addition of a colorful two-tone rug and matching towel border? Choose gay rags, rug yarn, or candlewicking for this stunning rug with flower motif—and inexpensive string for a matching towel, or if it's a "throw" rug for your bedroom that you need, you can make it with a matching scarf. In pattern 5752 you will find complete instructions and charts for making the rug, towel band and scarf; an illustration of them and of the stitches used; material requirements; color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg.

There is no Alice Brooks pattern book published

The World of Wheat.

By H. G. L. STRANGE

Director "Crop Testing Plan."

"De malt barlee, she lak' de woman. To get bes' result mus' humor her.

"Besides, de feller w'at drink de beer is plaintee particulaire also."

This was the sage advice given to me by Phillippe, one of the best hired men who ever came out of Quebec. Phillippe's father was "mos' smart man for grow malt barlee."

Phillippe helped us to win many a dollar for malting premiums. Here is his advice, much in his own words:

1. "Mus' use O.A.C. vingt et un—d'at's twenty-one you know.

2. "Nevaire cut crop till she's ripe. Green kernel mak' de poor malt.

3. "To kip nice colour, fit good night-cap on stook for kip away de dew and rain, d'en thresh de caps separate for feed.

4. "Mus' try kip one-eight, maybe one-quartaire inch awn on barlee. Nevaire skin de kernel. To do d'is mus' run thresh' machine more slow d'an for de wheat. D'en tak' out mos' all concave. Maybe if barlee too dry, use wood concave same as for thresh de pea. Separator man sell de wood concave 'bon marche.

5. "If kernel still skin, d'en feed de bundles butt first into thresh' machine."

Following factors have tended to raise price: French wheat crop indicated as only 221 million bushels -- Poor harvests in Morocco -- Official report Argentine wheat and flax crops reduced by drought -- Indian monsoon a failure -- U.S. corn crop deteriorates in southwestern section -- No increase in Mediterranean raisin crop.

Following factors have tended to lower price: Free offers of wheat from Russia, the Danube, Canada, and the U.S. -- France and Germany doing everything to curtail imports -- Fair price prospects in India -- Some rains in Australia and Argentina -- Liberal offers of South African corn.

Canada Has Charm.

It is expected that 1937 will break all previous records for tourist traffic in Canada, even passing the high mark set in 1929.

The Dominion's national parks are continuing to draw visitors, chiefly from the United States. Last year some 16 million people journeyed to Canada. Over a recent week-end some 500,000 Americans crossed the border, which is in itself a record. Returning prosperity in the United States has been swelling their numbers since the low mark set in 1933, but for 1937's marked increase tourist traffic in this country other reasons are advanced.

Government Costs More Than Britain

The cost of government in this poor, misguided province is steadily mounting. The various sessions held this year means additional indemnities, and from the Premier to the humble member, all demand indemnities whether the session lasts a week or eight weeks. There is considerable discussion among taxpayers, and with reason. The cost of government in Canada is too high and something must be done to reduce representation. The North Battleford Optimist has the following to say on the subject:

"There are 615 members in the British House of Commons. The cost now figures out at £369,000 or about \$1,845,000 a year. At that, legislation in Great Britain costs less than it does for Canada's 11,000,000 people.

"In the Dominion parliament there are 245 members of the Commons and 96 senators and each draws a sessional indemnity \$4,000, or \$1,364,000, plus a considerable amount more for travelling expenses. In the nine provincial legislatures there are, in all, 553 members who draw from \$400 a year in Prince Edward Island to \$2,500 a year in Quebec—totalling \$962,000 per year plus another goodly sum for travel.

"The cost for legislation in Canada then, omitting travelling expenses, \$2,326,000, or just about a million more than the cost in the United Kingdom. Reckoned on a per capita basis it costs each Briton just about three cents per year to keep his parliament going. It costs each Canadian 21 cents.

"Canadians, by this computation, are paying seven times as much for government services, which have no comparison to the wider duties and immensely greater responsibilities of the legislators of the Old Country.

"Canada's over government has become an incubus. It will only be reduced to proportions commensurate with our ability to pay when the people demand its reduction. Our politicians are the least likely to advocate economy in this direction."

CLASSIFIED ADS.

Strayed.—Dark Bay Saddle Gelding, weight 1000 pounds; small saddle marks. Reward—E. W. Phillips, Olds School of Agriculture (35c)

For Rent After September 19th.—Comfortable home; good barn and garage, chicken house etc. Hard and soft water on premises. Rent \$15.00 per month. Apply to the Pioneer Office or Mrs. M. Krebs, 211 Armour Bldg., Calgary. (35c)

Burnside Notes

Mr. Fred Metz was a Saturday visitor in Calgary.

Mr. and Mrs. N. Eckel and Robert were Friday visitors to the southern city.

Mr. and Mrs. Frank Heahling of Detroit, Michigan, spent the weekend with Mr. and Mrs. Charles Mardon.

Ralph Long, Jack Clark and Gus Bittner were Sunday visitors at the Eckel home.

Lone Pine W.I. will meet on Thursday, September 9th, at the home of the president, Mrs. Wm. Lyons.

Misses Elsie and Jessie Topley of the Royal Alexandra Hospital, Edmonton, are holidaying at their home here.

Mr. and Mrs. Lewis McCulloch and two children, and Mr. and Mrs. Bob McCulloch, of Turner Valley, spent the weekend with their parents Mr. and Mrs. Wm. McCulloch.

Mr. Fred Evans is the new teacher at Burnside School, succeeding Mr. Albert Arlenson who taught there for nine years and who is now moving with his family to Alliance, where he has taken a position in a graded school.

Items of Interest**Stately Cats Have to Wear Bells.**

The "Cat Belling Bylaw" went into effect in Stately a couple of years ago. This year there are probably twice as many robins and other song birds in the Stately gardens as ever before, and there have been no complaints this year in connection with cats destroying and damaging gardens, shrubs and trees. People who own cats which they value take care of them, either belling them or not permitting them to run at large.

CFAC, the Herald, will join the ranks of foremost stations on the Canadian Broadcasting Corporation next month, when the present 100-watt power is boosted up to the 1000 watt figure.

L. W. Ashton of Creston threshed 668-1-3 bushels of wheat from 11 acres, the per acre yield thus being better than 60 bushels. The wheat was of the Jonas Fife variety which is a type of winter wheat. The size of the heads in this wheat field was remarkable. Lloyd Nowlin, Alberta Pool Agent in Creston, reports that one of the heads measured 6 1/8 inches and contained 129 mature kernels by actual count.

Supervision of the Alberta Liquor Board was taken over Monday by two men, replacing the acting chairman, A. J. Mason. J. A. King, former chief inspector of the sales tax branch, and J. F. Percival, deputy provincial treasurer, have been appointed to the new board, Provincial Treasurer Solon Low announced.

Social Credit forces are unlikely to contest the Edmonton by-election called for Thursday, October 7th, to fill the legislative seat left vacant by the death of G. H. Van Allen, K.C., Liberal, Edmonton, even though other parties do enter candidates, according to the Calgary Albertan. The Edmonton Social Credit directorate met on Tuesday night, but discussion of the by-election was not on the agenda. However, the directorate in the near future will probably set a date on which the question of participation in the election can be discussed by the various groups and zones.

An organization meeting of the Royal commission appointed to inquire into the economic relations between the Dominion and the provinces will be held in Ottawa Sept. 8. Prime Minister Mackenzie King stated Tuesday night. Chief Justice N. W. Rowell of Ontario, chairman of the commission, will meet his colleagues in the capital and work out a plan of operation and an itinerary for the hearings which will probably be held in all the provincial capitals.

Former secretary-treasurer of the Alberta provincial command of the Army and Navy Veterans in Canada Sylvester W. Gilfof of Calgary was arrested by Calgary city police on Tuesday afternoon on a warrant charging theft of \$2,500 from the association between June 26, 1936, and last Monday.

Entry of a Social Credit Candidate in East Ottawa for the Ontario general election, October 6, is under consideration. Alec Denomee, president of East Ottawa Douglas Social Credit Club, was mentioned as a likely candidate. He promised to give the executive a statement on Saturday as to whether he would run.

Sir Delves Broughton, president at a traffic court in Cheshire, Eng., said circumstances were extenuating when he dismissed a charge against a driver for not having proper control of his car. The driver had explained: "I was intoxicated by the joy of being married only three hours previously and was kissing my wife. It was a foolish thing to do."

PUBLIC NOTICE

In the interests of public health and in order to prevent, if possible, the recurrence of an epidemic of dysentery, all citizens, including the vendors of food and restaurant keepers, are urged very strongly to see that all screens and screen windows are made tight. "Prevent flies from getting in, but if they do get in, swat them."

See that as much garbage as possible is burned, and if you cannot burn it at all, have it placed in covered containers to await removal by the scavenger.

All toilets should be made fly-proof. Make all requests for the scavenger or sanitation service at the office of the Town Secretary. Prompt attention will be given to such requests, and it is hoped that each and every citizen will co-operate in keeping the town clean.

By order,
LOCAL BOARD OF HEALTH
DIDSBURY.

NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of DANIEL KLINCK, late of Didsbury, in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims on the estate of the above named Daniel Klinck, who died on the 27th day of March, A.D. 1937, are required to file with W. A. Austin, Solicitor, Didsbury, Alberta, by the 18th day of October, 1937, a full statement, duly verified, of their claims and of any securities held by them, and that after that date the Executors will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or brought to their knowledge.

Dated this 30th day of August A.D. 1937.

W. A. AUSTIN,
Solicitor for the Executors,

WORLD HAPPENINGS
BRIEFLY TOLD

The Spanish insurgent administration issued a diplomatic note stating that the Holy See had recognized the insurgent junta as the legitimate government of Spain.

William Downing of Kitchener, Ont., was elected president of Canadian Florists' and Gardeners' Association at the annual convention at Montreal.

Laura Miller Dunsmuir, 80-year-old widow of Hon. James Dunsmuir, former premier and lieutenant-governor of British Columbia, died at Victoria recently after a lingering illness.

Income tax collections for the first four months of current fiscal year totalled \$86,455,388, a gain of \$13,972,214 over the corresponding period last year, a statement from Revenue Minister J. L. Ilsley said.

An inscribed bronze sword, dated about 800 B.C., and dredged from the river, has been given to Lord Desborough by the Thames Conservancy Board of which he was chairman for many years.

Gwynne Johns, 27-year-old former clerk, claimed a new world record for a delayed parachute jump. He leaped from a plane at 22,400 feet over Salisbury Plain and said he fell 18,000 feet before pulling the ripcord.

Muted bells for conductors are being placed on buses in London, the bells instead of being exposed being situated in a panel behind the driver, only a small volume of sound issuing.

For two years aide-de-camp to Lord Bessborough, former Governor-General of Canada, Michael Adams has been appointed assistant private secretary to the King. When at Eton he was a page to George V. He is 26.

More radio sets are in use in Great Britain, in proportion, than in any of the major countries of the world. Britain has 8,234,000 licenses in force, equivalent to one radio set to every 5.4 inhabitants.

Colonial Secretary William Ormsby-Gore indicated to the League of Nations mandates commission that the British government blamed outside influence for the Arab-Jew disorders that swept Palestine last year.

Seagram Gold Cup

International Golf Match At Toronto
September 7

Preparations are almost completed for the first international team match between the Professional Golfers' Associations of the United States and Canada. This will be played at the St. Andrew's Club, Toronto, on Tuesday, September 7, and will be almost similar to the Ryder cup matches between the United States and Great Britain. The latter is decided by four foursomes and eight singles, each over 36 holes, while the U.S.-Canada match will be decided in one day. There will be ten singles and five four-ball matches.

The U.S. has already won one international team match this year, defeating Great Britain in the Ryder cup, at Southport, England, and there will be but one or two changes in that team. In all probability a couple of foreign-born pros will be added to the U.S. Ryder cup team.

The Canadian P.G.A. has decided that the first five players in the Canadian professional championship will be invited to be members of the team. This championship will be decided at the Ottawa Hunt Club over the 72 hole route during the third week in August. The other five places will be filled by players selected on their performances in other competitions during this and past seasons.

It will be seen that both the United States and Canada will be represented by their strongest possible teams, and therefore, the field for the Canadian open championship will be exceptionally strong. The team match will be a great curtain-raiser for the 72 hole struggle for the Canadian title, the Seagram Gold Cup, and the first prize of \$1,000.

Last year the Seagram Gold Cup was won by Lawson Little playing in his first season after leaving the amateur ranks. It would be a feather in any amateur's cap to finish well up in this year's strong field for the Canadian open title and the trophy, one of the finest rewards in golf throughout the world.

ARTICLE No. 5

EARLY SIGNS OF CANCER

There is nothing so important to the man or woman of 35 years and over, as a knowledge of the early signs of cancer. Such knowledge is readily acquired by the average person of intelligence. What are the early signs of cancer?

Pain is not an early sign of cancer. It is a great pity that all beginning cancers had not the pain of an aching tooth. In such case the pain would drive the person to seek advice. The early signs of cancer may be grouped under the heads of: lumps, bleedings, persistent sores, hoarseness of a chronic nature, difficulty in swallowing, change of regular habits in respect to digestion or movement of the bowels.

A familiar example of a lump that may be a cancer is one appearing in the breast of a woman. Such a lump should be discovered by the woman herself when it is the size of a pea. Often the woman does find the lump at this stage, but through modesty, fear or for some reason, she says nothing about it until the lump is as large as a walnut or until other lumps appear under the arm-pit.

Irregular bleedings may appear from any of the orifices of the body. Especially significant are bleedings occurring in woman a year or more following the menopause. Persistent sores are frequently seen on face and hands, on the lips, on the tongue, inside the mouth or throat. They are manifested in black or yellow scales on the faces of elderly men and women; they occasionally appear in the character of an over-head wound, in what is called a keloid. Not all of them are cancers; in some cases they are pre-cancerous conditions. They are plain to be seen. All of us who are observant, see these early signs every day of our lives. Chronic hoarseness is usually due to syphilis, tuberculosis or cancer of the larynx. Difficulty in swallowing frequently means cancer of the oesophagus or swallowing tube.

The person who previously has had excellent digestion and begins to have dyspepsia, or the chronic sufferer from indigestion who shows a marked change of habit in this condition, may have early cancer. Similarly the persons who become constipated after a life of regular bowel habits or who becomes the subject of diarrhoea, may have cancer of the bowel as a cause. All these early signs of cancer merit and should have the closest investigation.

Lighted Highways

Lighting Carried Out On Extensive
Scale In United States

Highway lighting has been carried out on an extensive scale in the United States and is said to be producing worthwhile results. It is a well-known fact that the bulk of motor accidents occur at night and it is claimed that lighted highways play an important part in cutting down the accident totals.

One recognizes, of course, that it would cost a good deal of money to illuminate Ontario's highway system. At the same time ample supplies of cheap power are available, and the motoring public, through taxation, is contributing plenty of cash to make the improvement possible.

The rotor that keeps your electric clock running requires only slightly more than 1,000,000th of one horsepower. And uses only about 75 cents worth of electricity a year. 2215

Takes Outstanding Pictures

Kansas Girl Spends Weeks Getting
Shot Of Wild Duck

Though a hopeless shot with a gun, and faced with conditions that would daunt the hardest duck hunter, vivacious Lorene Squire, official photographer for the American Wild Life Institute, thinks nothing of spending three weeks in a soggy marsh waiting for one good camera "shot" of a wild duck.

Tanned to a deep bronze by a month's outing in northern Saskatchewan, where she obtained many bird life photos, Miss Squire recently passed through Winnipeg on her way to northern Manitoba marsh areas.

"It has always been my ambition to come to Canada to see the ducks in their nesting grounds. Now I have, and have some good pictures of baby ducks swimming about on the water," Miss Squire said.

Her career as a photographer started ten years ago in Kansas when she went duck hunting with her father and mother. "I was pretty terrible with a gun, so I began shooting with a camera." The result has been a series of outstanding pictures of wild life on the wing.

"It's hard work," said the young Kansan. "About only five out of a hundred pictures are successful. I spend days in the darkroom getting the effect I want." She uses a two miniature reflex with 15 centimetre telephoto lenses.

The young girl, a graduate of Kansas University, came to Canada as the result of communications with the officers of the Alberta, Saskatchewan and Manitoba Game and Fish Associations. She intended to spend about a month in Manitoba before travelling westward again to the Fort Chipewyan area.

MAKE THIS MODEL AT HOME—
KEEPS YOU SLIM 'N' TRIM
ALL DAY

By Anne Adams

And now for a slimming bit of magic to keep the busy homemaker looking smart from sun-up to sun-set! Where is the "thirty-four to forty-eight" who wouldn't welcome this clever coat-frock that's as flattering to the figure as it is easy to make! You've plenty of comfort, too, in the brief, slashed sleeves, flattering V-neckline, and buttoned-front that's fastened in a jiffy. And don't overlook that handy, square pocket that's as useful as it is ornamental! For fabric, why not select a colorful percale, sturdy gingham, or cotton broadcloth? Make up several versions.

Pattern 4363 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 5 yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

A London book store, said to be the world's largest, carries 2,000,000 books in stock and operates 500 circulating libraries.

THE CANADIAN ADVENTURE
TRIP OF BOB SIM, AN
ONTARIO FARM BOY

No. 8 of a Series of 16 Letters

Has three male companions and is travelling by car again! Experiences a storm at Thunder Bay which ruins their breakfast; visit Callander and beat Daddy Dionne out of three autographs; see the mines in the North and marvel at the activity. On, and on, Bob and his companions go. Are you travelling with him? Follow these stories and see what he thinks of our country.

North Shore of Lake Superior, (Special Despatch by Bob Sim).—Here we are, four automobile voyagers, perched on the edge of this greatest of all lakes, by name Superior. Last night we drove till dark then pulled into this cove. Deep down in a rocky gorge the dark waters of some nameless river poured with violence from the foot of a thirty-foot cascade into this great blue inland sea. We climbed down the rocks to the water's edge, cooked supper and made camp for the night. We went to sleep in the deep woods with a feeling of exultation, with the sound of tumbling water in our ears. At four in the morning we awoke almost in terror with the sound of a multitude of mosquitoes in our ears. It was a fine contrast of Beauty and the Beast. We cooked breakfast: a gallon of porridge, eight eggs, and coffee, with the angry beasts about us. Then one of those sudden violent storms that gives Thunder Bay its name, descended upon us, without warning, to soak our beds and breakfast, reminding us of Newbold's lines:

"Sure if misery man could vex,
"There it beat on our bended necks."

The Trip So Far

From Toronto we went to Kingston, then to Ottawa, following the Ottawa River up to Petawawa to strike west from there to North Bay. This is the historic route followed by Canadian voyagers as they paddled their great freight canoes, laden with pemmican, from Montreal to the heart of the continent. When we reached Fort William we will rejoin the route and follow it to Winnipeg. At Callander we visited the quintuplets. At Sudbury we spent some time visiting the mines and smelters. We saw logs turned into newsprint at Sault Ste. Marie, and crossed over to the United States which was necessary as the trans-Canada Highway is not completed on the north shore of Lake Superior. From Duluth we came back to Canada striking the trans-Canada Highway at Fort William and Port Arthur. Then it's westward ho, and it's to the mighty west we're bound.

A Glimpse At Quintland

Callander three years ago slept on the east shore of Lake Nipissing. A sawmill, a station, a filling station, a church or two, and a quiet, efficient little country doctor. Then the quintuplets came and this little grey headed doctor saved their lives. To-day Callander, home of the world's most famous babies, is the world's most famous village. It has several filling stations with special rates for five gallons of gasoline, a thriving hotel, and a number of tourist homes. Visitors have their pictures taken in front of the white picket fence of the babies' doctor. A few miles east of Callander there lived a French community, on poor sour land with gaunt, miserable buildings. To-day a broad highway runs to the door step of the Dionne home around which has grown a very healthy mushroom. This mushroom includes the Dufour hospital, with a special gallery where visitors may see the babies but not be seen. A five-acre field provides parking space; a boy sells lucky pebbles from the Dionne farm, another lad collects twenty-five cents from those who want their pictures taken in his ox cart; Daddy Dionne has a store, forty by fifty in size, and busy as a land office, Daddy himself, once a French-Canadian farmer two jumps ahead of the wolf, sits in a curtained room and collects twenty-five cents for his autograph. We fooled him by using carbon paper in our album, getting four signatures for the price of one. Daddy is as well groomed and tailored as a Montreal financier and appears to have no worries. His farm grows mustard and weak hay. He now cultivates a more productive soil—human gullibility. Barnum said: "One is born every minute", and he was right, for they seemed to be all at Callander.

What about the babies, you say? Well, I am but a mere man. They were just five healthy, energetic, beautiful little girls, all identical, all charming, all very wealthy. Do you know a fairy story more preposterous, more grotesque, more absorbing, than the story of these five little French-Canadian ladies who stole the heart of the world?

I'm glad I went.

The North Land

The North of Ontario is so vast that in comparison the South shrinks to a cluster of villages. Railroad and highway cut across it here and there like strokes of a knife on an immense batter. There is a mark here and there, a slight dent on a vast stretch of rock and forest. It is also a rich land. Bare little villages grow up here and there as men go

about the business of cutting timber and extracting metal from the hills. The village may die, sinking back into the solitude of the North. It may grow into a great ugly growing town like Sudbury.

At Sudbury, we visited the mines, and the smelting plant. We did not go underground but we saw the smelting operations. Nickel, very much in demand to-day, is the chief product of the mines. Wages are high, men are being hired every day, money is plentiful. Yet it looks like a slum, compared to Annapolis Royal in Nova Scotia. In an area of about twenty acres five thousand people are crowded, often a whole family crowded into one room. Children play in the street, the library would be small for a village. But it is growing at the rate of three thousand a year, and houses are as scarce as trees in China. Some day it will mature, acquiring libraries and playgrounds; to-day it is a real mining town.

On To Winnipeg

At Winnipeg we will get our first mail since leaving home. We will get our shirts washed, have a bath, sleep in a clean bed, then strike west.

On and on our auto goes,
And where we'll land nobody knows.

Difference Of Opinion

People Disagree On Thickness Bacon
Should Be Sliced

How thick should a slice of bacon be?

Most bacon-for-breakfast enthusiasts are hearty trenchermen and consequently are inclined to say that all slices of bacon, except those they slice themselves, are too thin.

But others, whose palates are pleased with delicate shades of flavor find that such nuances are readily obtained by the thinness of the slice and that they can toy enjoyably with a tissue-paper fragment of pork.

There is a sharp cleavage of opinion on this important question. It has come to a head in the bacon-loving State of Tennessee where in response to public clamor the State Legislature is dealing with the question.

It appears that of late bacon has been sliced too thin in that State. It is averred that someone has invented a machine which will slice bacon "to such an infinitesimal thinness as to make it invisible to the naked eye at a distance of four feet when lying on a white plate."

But whose eye is four feet from the plate when they sit down to breakfast? And anyway bacon is not sliced for purposes of being looked at but in order to be fried, broiled, grilled or otherwise processed and then eaten.

Anyway the hearty trenchermen of Tennessee rebelled against the thinness of the slices and took the matter to the Legislature which now has before it a bill begging the thickness and area of a slice at a minimum. The dimensions set down in the bill are that the slice shall not be shorter than 1 1/2 inches nor less than 1-132 of an inch thick.

Now this doesn't seem reasonable. If one takes a slice of that size and cooks it will there be anything left? Would it be visible to the naked eye or even to the eye clothed in powerful horn-rimmed specs? But more important than that, how many such slices would it take to halt the appetite of a healthy Tennessee mountaineer?

And if the purpose of this proposed legislation is to make the slices of bacon thicker then indeed they must have been infinitesimal before.—Saskatoon Star-Phoenix.

Some Compensation

Archbishop Of Canterbury Received
Kind Letter From Old Lady

An explanation for the popular conception he had "fumbled" the crown during the coronation ceremony was made by the Archbishop of Canterbury at a banquet of the Society of Knights Bachelor.

The Archbishop declared: "I could make a most sincere apology for that performance, but it brought some compensation in the form of a letter from an old lady who said, 'the most beautiful thing in the coronation was to see the dear Archbishop blessing the four corners of the crown before he put it on the King's head.'"

Tantalum, a rare metal worth \$2,500 a ton, has been discovered near Darwin, Australia.

Some who change their minds find they don't work any better.

THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER IX.—Continued

"Oh, it means," said I, "they think all us Catholics should be hanged. The ladder is the step up to a gallows, and the rope has a noose at the end of it."

The child felt quite distressed. We both knew all about the hanging business.

"But what have you done wrong, Paddy?" she asked me.

"Oh, don't worry," said I, "we're all poor miserable sinners."

"Well, Paddy," she advised me, "I do wish you would get converted, and be saved, and join our church."

"Have you been converted yourself?" I asked her.

"No," she told me, "I have tried and tried, Paddy—but it won't take!"

"Sure," I said, "I know you are not converted, or you wouldn't be pinching peppermint drops on your Aunt Letitia."

"But you won't tell?"

"No," said I, "mum's the word!"

Another visitor we had shortly afterward was a stylish young belle from Markham Township. On the first Sunday afternoon after her arrival, three young gentlemen of the neighborhood strolled up separately to the Marshall house. Curiously enough, they had all suddenly been struck with the notion, at church that morning, of seeing how our crops were getting along. They were all invited in, of course, and introduced to Miss Matilda Lea. Why is it, I wonder, that a self-conscious young lady, on such an occasion, gives vent to so much girlish laughter—unless it be to show her teeth? The gathering became quite dull and formal, as might be expected.

The guinea hens, those noisy harbingers of company coming, set up their infernal, peevish chatter of "buck wheat! buck wheat!"

Betty went to the door to look out.

"Here," she exclaimed, turning to address the company, "is Johnson Potter up the lane. I suppose he is coming, too, to see how our crops are!"

I mention such trifling things as the visit of this marriagable girl to the Mono farm because the only theme I have in this simple narrative is the homely and commonplace in the lives of pioneer Irish folk on the Ontario countryside. And a poor job it is! If I were able, I would make it as clear cut as the toll of their dinner bell, and as transparent as a sheet of polished glass. They are all dead and forgotten; but such simple, natural, wholesome lives make the history of the country where their bodies lie. God bless them! They are all off on the way of truth now.

By his more aggressive tactics, Potter won out in that afternoon contest. He got his spoke in first; and, yea, Miss Matilda would be charmed to go for a buggy ride with

Mr. Potter the very next evening—d.v. as to the weather. The result, in brief, was that Potter not only had a good many meals at the Marshall table, where he proved a capital trencherman, but he got a wife who made good meals ready for him for the rest of his life.

Young Betty was simply fascinated with Miss Matilda's charming ways. Straightaway the child was primping about with her head tilted to one side. She was giggling incessantly without any apparent cause, and showing her teeth. The youngster was actually drifting around in a day dream; and her dream, of course, was that she was the beautiful Miss Matilda Lea. When I noticed the young actress was getting picky and fastidious about her victuals, I made it my business to open my mind to her on the side.

"Cut it out, Betty," I told her, "we all know you have a stomach!"

"Well," she said, "Matilda doesn't eat much."

"No," I replied, "not while Potter is around; but did you ever notice how she gorges herself in the back-kitchen?"

Next spring's plowing time, the yellow, wide-boarded floor of the kitchen became Betty's constant care. At all hours, I would find the skinny youngster on her knees, scrubbing the great expanse and giving it the dickens. And she was strongly of the opinion, seemingly, that it was my dirty boots that made most of this scrubbing necessary. For some unaccountable reason, she did not notice the tracks Bob and the children made, or the mud her father and the other men trailed about as they shuffled across the floor for their meals. But if she spied any dirt on my boots, there was a riot immediately.

"Just look at the dirt on Paddy's feet, Ma!" she would exclaim in despair, as she brushed a wisp of stray hair back into place from her sweaty forehead. "Do I have to scrub this floor again for that dirty clodhopper?"

"Please pass me a bite to eat in the shed," I would say to Mrs. Marshall. "It is better to dwell in the corner of the housetop than with a bawling woman in a wide house!"

"But he doesn't seem to care, Ma, how much work he makes me!"

And she had the pinch of the argument on me; because from the time she was seven, Betty had always darned my socks for me, and seen to it that they patched up my clothes and kept my things shipshape.

"Well, Betty," I said to her at last, "you'd better make me carpet slippers; and, by the grace of God, I'll never touch your dirty old floor without them."

And the result was she made me an awkward-looking pair, which caused a lot of hilarity in the household. And I kept my promise—but only in muddy weather.

But the carpet slippers only served to transfer the scene of hostilities from the yellow floor to the bench by the back kitchen door. All my life long I have had trouble with my feet in warm weather. So in the evenings that summer, I made a practice of soaking them very carefully and deliberately in a bucket of rain-water and soft soap. And I found a comfortable place to do this was by the bench at the back kitchen door. But young Betty was raising morning glories and wild cucumber vine along the wall; and she complained of the slop I made, and declared the caustic in it hurt her flowers. Where the hired man is to wash his feet has always been one of the weighty problems in Ontario agriculture. Betty insisted that I do it elsewhere. I held to the opinion my feet should be washed close to the rain barrel.

These great issues were joined and went down to trial one summer's evening. Betty's temper had got quite the better of her and she was tongue-thrashing me in an outrageous manner. I slushed the soapy water in her direction, which sent her screaming round the corner of the house. I put a dipper of fresh water in my foot bath; and, as she returned to the fray, I wiggled my toes at her. She promptly let a piece of broken crockery drive at me with one of those underarm, left-hand swings that should in all decency have put it clear over the roof; but the sharp edge of it caught me a nasty dig on the base of my toes at the rise of the instep. A lovely squirt of blood shot out. I always did bleed like a stuck pig. It was a grand shot for an eleven-year-old girl to make.

"Now, look what you've done!" I declared. "You'd murder me, would you, you little she-devil!" and I tipped out the colored water to show her the great quantity of blood I was losing.

"Oh! Paddy," the child exclaimed, "I didn't mean to hurt you so real bad as that."

"Well, look what you've done," I warned her. "You've killed me entirely."

And the next moment, I had a curious mixture of tears, and tow-head, and bleeding foot on my hands.

"Oh! Paddy, I'm very sorry," the youngster sobbed, "because I love you so!"

"You show it, don't you?" said I, "murdering me in cold blood."

"Oh! Paddy, dear," she told me, "I didn't really mean to hurt you, because when I grow up, and have long skirts, I'm going to marry you, Paddy, and have babies for you."

"Oh, no, you're not!" said I.

"Ladies with long skirts have babies for their husbands," she informed me.

"Yes!" says I, "but God sends them."

"Well," she pondered, "couldn't He send me a nice red-headed one for you, Paddy?"

"Well," said I, with a mournful sigh, "it's a dead man I'll be by the morning, Betty; and when you grow up to be a big miss, it's Peg-top Carson you'll have to be marrying. Go, please," I asked her, "and get your ma to give me a piece of white rag."

Sarah Duncan bandaged my foot up in smart order.

"Paddy," the young person remarked, "you can wash your dirty old feet here, if you want to."

"No, Betty," said I, "to keep peace in the family, I'll wash them over by the well where the drinking water comes from."

And I heeled it upstairs to keep from bloodying the steps.

Hours later, Betty called up to me: "Yally, yally you who! Paddy, are you all right?"

"Sure," said I, "I'm fine."

"Has it quit bleeding, Paddy?"

"Sure," said I, "it's caulked up as tight as the inside of a boat."

"Sleep tight," she hollered, "and don't let the bugs bite!"

The morning after, Betty was not even enough interested in the overnight occurrence to ask me how my foot was doing; and henceforward, she treated me with an indifferent civility that gave no occasion for quarrels and scoldings. I was left to shift strictly for myself in the matter of keeping holes out of my socks and losing my mitts in winter time. A lad of the hobbledohoy age is usually sensitive; and my feelings were deeply hurt by this turn of events. I suppose the child had been given a good scolding after the cutting of my foot, and strict orders to quit bothering Paddy; and, as one slams a door after bunting into it, Betty may have felt a grudge against me because of her troubles. At the time, however, I knew I had done nothing to offend the child, and I thought she was following family instructions to put a no-account fellow like me in his proper place. Yet, I didn't let on.

(To Be Continued)

Man In The Moon

Eastern Editor Has No Wish To Make The Lunar Trip

Much is said now and again of attaining altitude by means of rockets and experiments continue to be made along that line. They tell us that by this means it would be possible to reach the moon, and now it is said, with this new outfit invented by the British Air Ministry, it would carry a man safely through the rare spaces between that dead world and ours.

This talk of the moon always leaves us cold. What would a man do if he did get there. And how would he get back if he succeeded in reaching our world's never failing satellite? He needs must have the engine to send him sky-rocketing back and he could hardly take it with him. For ourselves though they invent a super rocket and suits to navigate the airless ether, it could never tempt us to leave good old terra firma.—Halifax Chronicle.

Rabbits are a serious menace during forest fires. They run from the burning area with fur ablaze and set new fires.

New Tax Levied For Education

Saskatchewan School Grants Increased July 1 With Education Tax Effective August 2

Government school grants in the province of Saskatchewan have been increased as of July 1, this year. This means an aggregate increase for all schools of approximately \$800,000.

Public schools will benefit to the extent of 50c per day per room. A one-room rural school, which last year received a government grant of \$1 per day for 200 days—\$200 a year—will now receive \$1.50 per day for 200 days—\$300 a year—an increase of 50 per cent. A two-room school will, of course, receive double this amount.

High schools and continuation schools, under the new schedule, will benefit to the extent of \$100 per year per room.

The legislature also appropriated \$200,000 for loans to school districts for the purpose of reducing the arrears of teachers' salaries incurred prior to January 1, 1935.

"Ever since the present government took office," states Premier Patterson, "it has had as one of its first objectives the restoration of school grants to the figure they were prior to 1932." He also adds that, because of continued crop failures and the consequent increased financial burden upon the government, it became impossible to make any increases. The legislature, however, at the last session decided that "the needs of education warranted the imposition of a new tax, earmarked for educational purposes." This provided the opportunity for the government to increase the grants as stated.

"The entire proceeds of this tax will be placed in a separate bank account and will be used exclusively for education services."

Premier Patterson's complete statement follows:

"The schools of the province of Saskatchewan are maintained largely by local taxes levied against real estate supplemented by government grants. Ever since the present government took office it has had as one of its first objectives the restoration of school grants to the figure they were prior to 1932. This would enable schools to remain open in the crop failure districts where tax collections are almost nil and would also permit of a general reduction in local tax levies for school purposes. With continued crop failures the finances of the province would not permit any increase of school grants and at the last session of the legislature it was decided that the needs of education warranted the imposition of a new tax, earmarked for educational services, which would provide funds for increased grants. At the session the School Grants Act was amended increasing school grants as from July 1st and The Education Tax Act was passed to come into force on proclamation. This provision was included in the act to give the Government an opportunity of making a full study of administration methods and to set up the necessary machinery for the collection of the tax with the minimum of difficulty.

"Since the close of the session an exhaustive study has been made of the operation of a similar tax in the Province of Alberta and a number of the states of the Union, the administrative methods followed in these places have been analyzed and from the information thus secured regulations have been drafted and the organization for the operation of the act has been decided upon. It should be remembered that the Legislature passed the act to come into force on proclamation so that its administration might be fully and properly organized before the tax was imposed. By consolidation of a number of revenue branches of various departments it will be possible to administer the Education Tax with very little increase in staff and ultimately it is intended to have all the major revenue branches under one administration.

"Because of the crop conditions in the Province this year, some suggestions have been made that the imposition of the tax should be delayed. The Government gave careful consideration to these suggestions but after taking all the factors into account decided that the conditions advanced as a reason for not imposing the tax made it all the more necessary if our schools are to be kept in operation. There will be this year a larger number of schools than ever before that will have the utmost difficulty in financing and the increased grant will be absolutely necessary in many, many districts. Even with the larger grant the problems of education are going to be sufficiently serious during the coming year and I am certain that the large majority of the people are prepared to

make some contribution to assist in keeping the schools open.

"It was decided, therefore, to proclaim the act to come into force on Monday, August 2nd. The Government asks the co-operation of the people of Saskatchewan in order to maintain our educational institutions in Saskatchewan. People do not like taxes and neither do governments, but we all have a responsibility to the future citizens of the Province who are now being educated and trained in our schools. The entire proceeds of this tax will be placed in a separate bank account and will be used exclusively for educational services. When you pay the tax you may feel certain that the amount paid will be used and used only for that purpose.

"Insofar as relief recipients are concerned, it will not be possible to make provision for the tax to be added to August relief orders, but for the new relief year commencing September 1st, relief schedules, irrespective of what may otherwise be done in connection with relief increases, will make provision for the Education Tax on the portion of relief purchases which are taxable.

"Owing to the very large area in which there is a crop failure this year, the province has to call on the Federal Government for assistance to a greater extent and involving a much larger expenditure than ever before. The money for these expenditures comes from the people of Canada. It is our duty to indicate to them that we in Saskatchewan are doing our utmost to meet the situation and that we seek their help only after we have done everything we possibly can. Accepting this new tax as unavoidable we can that much better apply for that federal assistance which will be necessary to carry us through our present difficulties.

"Again I ask the co-operation and assistance of the people of Saskatchewan in a patriotic support of our schools and educational institutions for the benefit of our young people and the future welfare of our Province."

Little Helps For This Week

In all these things we are more than conquerors through Him that loved us. Romans 8:37.

Thus my soul before my God
Lies still, nor speaketh more,
Conqueror thus o'er pain and
Woe.

That once snote me to the core;
Like a silent ocean bright
Basking in God's praise and light.

My mind is forever closed against embarrassment and perplexity, against uncertainty, doubt and anxiety, my heart against grief and desire. Calm and unmoved I look down on all things for I know that I cannot explain a single event, nor comprehend its connection with that which alone concerns me. In His world all things prosper, this satisfies me and in the belief I stand fast as a rock.

Air Route To Alaska

U.S. Air Officials Plan Route Via Edmonton And Yukon

A concrete step toward developing the mooted air route to Alaska and eventually to Asia by way of Edmonton and the Yukon, was taken when a group of United States government air officials and officers of air line visited Edmonton.

The party investigated the possible establishment of an air mail service through Edmonton to Alaska. Plans have been under study for some time past for connection of the Edmonton-Whitehorse line southward to Lethbridge, to tie in with American and trans-Canada services, and for eventual extension of the Yukon route into Alaska. Tentative negotiations are already under way between governments and air companies of the United States and Canada.

The Purpose of POOL Elevators

THE major function of the Alberta Wheat Pool elevators is to give support to the natural aspirations of Alberta farm people for more secure, comfortable and happier farm homes.

Every Pool elevator may be said to be a sentinel guarding the marketing interests of the grain producers in that locality. It also serves as a link connecting all parts of a great democratic movement, working on behalf of the men and women engaged in Canada's basic industry.

Every grain grower can aid himself and the entire agricultural industry by hauling his grain to a Pool elevator.

By so doing, a useful and serviceable farmer-owned organization is strengthened; the non-profit co-operative movement is advanced; and a greater degree of unity is attained among the grain-growing farmers.

LOCAL & GENERAL

Mr. Eddie Clemens of Calgary was a Sunday visitor at the home of his parents here.

Mr. and Mrs. Frank Kaufman and Evelyn spent the weekend in Banff.

Calgary Salvation Army Boys' Band will give an hour's band concert Saturday evening from 7 to 8.

Mrs. W. Morrow of Calgary spent the weekend with her parents, Mr. and Mrs. H. M. Reiber.

Mr. and Mrs. Frank Farrow and two sons of Calgary were Sunday guests at the Erven Rodney home.

George Boorman left on Saturday for Bentley to continue his duties at the Andrews School west of that place.

Why not try a pair of our \$2.50 Harvest Shoes? They are extra good value—T. E. Scott.

Earl StClair left last week for Calgary where he has accepted a position with the International Harvester Company.

"You Live Only Once," with Sylvia Sidney and Henry Fonda, which appears at the Opera House this Friday and Saturday is a spell-binding drama.

Mr. Don Cameron, who spent his vacation at home in Edmonton, returned on Monday evening to take up his school duties.

Mr. and Mrs. William Bishop of Penitence, B.C., are visiting the latter's parents, Mr. and Mrs. T. Murphy, and friends in the district.

Mr. Arthur Evans left on Monday for Winfield, Alberta, having received a teaching appointment at a school near that point.

Messrs. Bob Eubank and Art Reiber drove to Calgary on Tuesday to attend the funeral of Mr. A. E. Allen, who died as a result of a motor accident near Innisfail.

Miss Helen Brown left Monday for Lymburne, Alberta, where she will continue her duties as teacher at Preston Lake School in that district.

For Best Values in all working clothes go to T. E. Scott.

Miss Ruth Moyle spent a few days here visiting her father and sister while en route to Edmonton from Ontario, where she spent her vacation.

Please note, due to Monday being a holiday, K. R. McLean, Eyesight Specialist, 210 Southam Building, Calgary, will be at the Rosebud Hotel Wednesday morning, Sept. 8.

Miss Marion Levagood who has been accompanying Mr. and Mrs. Arthur Toogood, returned last week after spending seven weeks touring Eastern Canada and the United States.

W. R. Hartley who spent a two weeks' holiday at Vancouver, returned home Friday. While at the coast he visited with former Didsbury friends, Mr. and Mrs. George Brewster and Mr. J. F. Skoyles.

Bishop and Mrs. E. F. Hallman of Teleta, Texas, and son, Rev. Wm. E. Hallman, and wife and son, Clemens, of Lancaster, Penn., are visiting Mrs. Hallman's brother, Mr. M. B. Clemens. They have been touring United States and Canada. On their return, Rev. and Mrs. W. E. Hallman will go as missionaries to the Argentine.

Mrs. J. Scrutton and daughter Rita left Sunday on the first part of their journey to their old home in England. They sailed on the Empress of Australia on Wednesday. Mr. Scrutton will follow them later. In the meantime he is still carrying on his photographic business.

A. E. Allen, aged 31, who travelled for the Barber-Ellis Paper House in Calgary, died Friday night at the Innisfail hospital after being severely injured in a head-on collision between his car and a truck on the highway near that town. Mr. Allen was well-known among the tennis players here, often playing on the local courts when in town.

Buy your Boy's School Shoes from T. E. Scott. We have them from \$2.00 up.

Will Protest Actions of S.C. Government

To "express public disapproval of the actions of the Aberhart government and the activities of its members" a mass meeting has been arranged by the People's League of Alberta for Wednesday evening, September 8, at 8 o'clock in Victoria Pavilion, Calgary. It was announced the first of the week by R. C. Drew, secretary of the league.

Mayor Davison will occupy the chair, and speakers will include Lon A. Cavanaugh, president of Calgary Board of Trade; D. M. Duggan, Conservative leader in the province; E. L. Gray, provincial Liberal leader; W. H. Davies, Didsbury, and possibly Robert Gardiner, president of the United Farmers of Alberta.

"You Only Live Once."

The most starkly human drama the screen has ever offered comes to the Opera House this Friday and Saturday when "You Only Live Once," Walter Wanger's first production through United Artists begins a two-day engagement, with Sylvia Sidney and Henry Fonda, screen sweethearts of "Trail of the Lonesome Pine," reunited in the starring roles.

Dynamic conflict, thrilling action and searing romance are combined in this story of a woman who risked her very life to fight by the side of the man she loved when the whole world condemned him and hunted him like an animal in every corner of the earth.

The Opportunity for Self-Help.

Being a strictly co-operative grain producers' organization, Alberta Pool Elevators claim that the policy of self-help is one calculated to achieve the best results. In other words, grain producers can achieve more for themselves by undertaking to build up non-profit grain handling organizations. Unquestionably farmers can progress further by a policy of self-help.

LOCAL & GENERAL

Alf Brusso, Tom Royds and Alf Durrer, having got a fish calendar, went out to try their luck again Sunday. The calendar said it was a good fish day and it proved to be right. They got a good catch.
